

NEW PHYSICAL THERAPY EVALUATION CODES

Component	Qualifier/Additional Detail	97X61 PT Eval Low Complexity	97X62 PT Eval Moderate Complexity	97X63 PT Eval High Complexity
History of Present Problem	Impacts the Plan of Care	no personal factors and/or comorbidities	1-2 personal factors and/or comorbidities	3 or more personal factors and/or comorbidities
Examination of body systems	Using standardized tests and measures	Addresses 1-2 elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions	Addresses a total of 3 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions	Addresses a total of 4 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions
Clinical Presentation		Stable and/or uncomplicated characteristics	Evolving with changing characteristics	Unstable and unpredictable characteristics
Clinical decision making	Using standardized patient assessment instrument and/or measurable assessment of functional outcome	Low complexity	Moderate complexity	High complexity
Typical Time	Face-to-face with Patient and/or Family	~20 minutes	~30 minutes	~45 minutes

NEW OCCUPATIONAL THERAPY EVALUATION CODES

Component	Qualifier/Additional Detail	97X65 OT Eval Low Complexity	97X66 OT Eval Moderate Complexity	97X67 OT Eval High Complexity
Profile and History	Occupational Profile Medical/Therapy History	Brief history including review of medical and/or therapy records relating to the presenting problem	Expanded review of medical and/or therapy records and additional review of physical, cognitive, or psychosocial history related to current functional performance	Review of medical and/or therapy records and extensive additional review of physical, cognitive, or psychosocial history related to current functional performance
Assessment(s)	Related to physical, cognitive, or psychosocial skills and that result in activity limitations and/or participation restrictions	Identifies 1-3 performance deficits	Identifies 3-5 performance deficits	Identifies 5 or more performance deficits
Clinical decision making, which includes an analysis of the occupational profile	Complexity	Low complexity	Moderate analytic complexity	High analytic complexity
	Assessment data analysis	Problem-focused assessments	Detailed assessment(s)	Comprehensive assessment(s)
	Consideration of treatment options	Limited number of treatment options	Several treatment options	Multiple treatment options
	Comorbidities affecting occupational performance	No comorbidities	May have co-morbidities	Comorbidities present
	Modification of tasks or assistance (e.g., physical or verbal) with assessment(s) to enable completion of evaluation component.	No modification necessary	Minimal to moderate modification necessary	Significant modification necessary
Typical Time	Face-to-face with Patient and/or Family	~30 minutes	~45 minutes	~60 minutes
